The Beauty of Wood The Brilliance of Fypon

When it comes to making your projects easier, nothing fits the bill like Fypon. So when your projects call for wood, Fypon PVC Trim is a brilliant alternative. Fypon PVC Trim has a density comparable to white pine and is available with a smooth finish or with woodgrain texture. And while you're sure to find Fypon PVC Trim's ease of use irresistible, you'll also find it resistant to moisture, decay, cupping, swelling, splitting, delaminating and insect infestation. Best of all, like all Fypon products, our PVC Trim is backed by an excellent Limited Lifetime Warranty and legendary support and service.

Fypon PVC Trim is ideal for:

- Soffit Systems & Fascia
- Corner Trim
- Window & Door Casing
- Flat Panel Applications
- Wainscoting
- Combined with Urethane in Hybrid Applications
- Field Fabrication from Sheet Stock

Painting (number of coats needed)	1 - If Desired	2	2
Water Absorption	NO	YES	YES
Will Not Rot or Decay	YES	NO	NO
Insect Resistant	YES	NO	NO
Moisture Resistant	YES	NO	NO

Superior Performance Across the Board

The Fypon PVC Trim product line consists of a variety of sizes and styles of from sheet stock to bead board. Available in several thicknesses and board widths, Fypon PVC Trim comes ready to use and easy to work with. The smooth surface provides a clean look to any exterior and the optional woodgrain texture offers the look of authentic wood.

Fypon uses the free foam PVC process to create our PVC Trim, resulting in a solid, consistent structure from the surface through the core. The density and cell structure of the PVC allows the product to cut smoothly without chipping, making it the perfect material for routing and milling.

With the performance that PVC provides, it's the perfect material for any trim project.
